REDE (Research on innovation, energy and the environment) is a research group at the University of Vigo composed of 28 researchers and 4 R&D managers. Our research agenda focuses on two main fields and their intersections: innovation management and operational excellence, on the one hand, and energy and environmental economics, on the other.

REDE (Research on innovation, energy and the environment) es un grupo de investigación de la Universidad de Vigo compuesto por 28 investigadores y 4 gestores de transferencia. Nuestra agenda de investigación se centra en dos campos principales y sus intersecciones: la gestión de la innovación y la excelencia operacional, por un lado, y la economía energética y ambiental, por el otro.
